---

It is hard to talk about contemporary techno without mentioning Adam X aka Traversable Wormhole. In a short space of time his TW imprint has become synonymous with dark, heavy yet completely listenable techno. With a background born from his early dj gigs in Brooklyn in the 90s', Adam has gone on to build on his musical skills bringing out some of the best, ethereal, other wordly yet ultimately danceable music tracks. We literally had a chat with Adam a few hours ahead of his 6 hour set at National Underground Friday June 24th and also playing with his brother Frankie Bones at Electric Warehouse Sat June 25th!
